

See clearly.
Act
confidently.

Why work with us?

- **Save hours every week** by automating repetitive admin and operational tasks
- **Make smarter, faster decisions** using practical data insights and AI support
- **Stand out in your market** with modern, efficient ways of working your competitors aren't using yet

Who we are

- We are data professionals who live and breathe helping businesses grow
- Our deep roots in data science and statistics, mean we know how to get the most from your data
- Experienced in
 - Leadership, strategy & governance
 - Data Analytics and AI
 - Software engineering
- UK-based, with a focus on small and mid-sized businesses

Our values

- Data and AI can help **everyone**, not just the big tech companies. We deliver results that are unique to your challenges.
- We will show you how to use tools that are **already available** to you or **free** to use.
- We will leave you with the **capabilities and confidence** to use data and AI more effectively.
- No jargon, we translate complexity into clear **business value**.
- **Engage your way** - one-off projects, retainers, or day rates

What We Do

Data confidence – we help you plug your data gaps and manage your increasing volumes of data more effectively. We help you collect your own data, make use of freely available data, comply with data legislation.

Data Analytics – we build products that give you clear visibility into your business with real-time insights allowing you to act quickly and confidently. We can fix your nightmare spreadsheets and save you from doing the sums yourself. We advise on the most useful measures for your business.

AI enablement - automate repetitive tasks, enhance decision-making, and extend your team's capabilities beyond traditional limits. We help you safely use AI to generate a plan, ideas, competitive analysis, even write the marketing emails. We automate manual reporting and improve the message.

Our Approach

1

Discover

Understand your data, goals,
and challenges

2

Design

Build the right solution for
your context

3

Deliver

Implement with hands-on
support

4

Embed

Transfer knowledge so your
team owns it

Real Results – Online Retailer

The Challenge

An online toy and crafts retailer needed to break into the education and children's activity market.

Our Impact

- AI-powered market analysis shaped a targeted Halloween campaign to capture share and drive sales.
- Coached the team on optimising and validating AI outputs for reliability.
- A comprehensive digital transformation initiative to amplify brand presence and capture market share within the education and events sectors.

“I was absolutely blown away by the results that the AI prompt gave us. Sure, it confirmed some of the things we already knew, but the suggested marketing strategy will save countless hours of work and ensure my products reach the right target audience.”

Real Results – Fitness Instructor

The Challenge

- A new Pilates instructor needed to find the best opportunity to launch mat classes in Brighton's crowded wellness market.

Our Impact

- AI-driven competitor and venue analysis within 5 miles of her location, uncovering market gaps and underserved audiences.
- Delivered a full launch strategy covering pricing, scheduling, and positioning, plus a marketing plan to build visibility and fill classes.
- We handed over the prompt so she can rerun or adapt the analysis independently.

“I can't thank Seabright Insight enough. They have showed me how to make the most of the free AI tools available to make sure I start my business from a well-informed position.”

How We Work With You

Flexible engagement models designed to fit your needs and budget

A la Carte AI project

Best for: Up to 5 challenges solved for you from a pre-defined list

Business problems AI can help solve

A la carte project - select up
to five topics from the lists

Marketing & Growth

1. We don't know what to post on social media
2. We need ideas to attract more customers
3. We don't understand our competitors
4. We need clearer product/service descriptions

Customer Understanding & Experience

5. We don't understand what customers actually want
6. We want to improve customer retention
7. We struggle to write proposals or quotes

Operations & Efficiency

8. We waste time rewriting the same emails
9. We need help writing policies or documentation
10. We need help turning ideas into action
11. Recruitment is too time consuming

Digital & Data Maturity

12. We want to improve our website but don't know where to start
13. We don't know what to measure
